### about me

Proactive self-taught developer with analytical, problem solving, and leadership skills. Aiming to leverage my programming skills to successfully fill the Software Developer role at your company. Frequently praised as hard-working and self-driven by my peers, I can be relied upon to help your company achieve its goals.

## Current Positions

### Software Engineer

[WipeOS](#)

WipeOS is a SaaS company that is used for enterprise data erasure. I work primarily on a portal that allows the user to view logs, reports, diagnostics, etc, for drives/machines they have wiped, as well as manage various customizations.

- Django
- AngularJS
- Postgres
- Linux(Terminal)

### Freelancer

[Live](#) [Code](#)

I have just completed a complete redesign of my first freelance client! Due to the requirements of the project, I decided to use a CMS based on Django called Wagtail. All the content of the site is managed with Wagtail, and I designed and built the front-end/UI

- Django
- Wagtail CMS
- Bootstrap4
- Sqlite3

## Projects

### Volunteer Platform

[Demo](#) [Code](#)

Platform to connect non-profits with volunteers. Non-profits place a listing for each of their projects, and users are able to browse through listings by category, location(soon), etc. Comparable to Upwork, but specifically to fill the need for volunteers for non-profits.

- Django
- Bootstrap
- html/css
- SQL(sqlite3)
- React(soon)

### Limited-Access Blog

[Demo](#) [Code](#)

Platform that allows a company to share sensitive information with their employees and only their employees(and other authorized individuals). This project makes use of invitation codes that a user must use to sign up.

- Django
- Bootstrap
- html/css
- SQL(sqlite3)
